

Teena Khatnani

ARCHITECT

Visionary architect and interior designer Teena Khatnani founded TKA-Designs during the challenging period of the pandemic. Her unique approach and exceptional attention to detail have quickly established her as a standout name in the industry. Her work is recognised for its ability to transform ordinary spaces into elegant, functional masterpieces that perfectly blend style and practicality,

reflecting her innovative vision and dedication to excellence. Through TKA-Designs, Teena continues to push the boundaries of design, crafting environments that inspire and elevate everyday living.

Excerpts from an interview...
"I believe my biggest achievement has been creating spaces that resonate with and serve the communities they're

designed for. My goal has always been to blend functionality with beauty in ways that make a tangible difference in people's lives.

"Achievers understand the value of consistency and hard work. They consistently set high standards for themselves and are willing to go beyond what is expected.

"ACHIEVERS UNDERSTAND THE VALUE OF CONSISTENCY AND HARD WORK"

"For me it's about going from paper to reality – bridging creativity with practicality and functionality – where each decision translates the initial vision into a space that feels authentic, functional, and inspiring in the real world.

"Knowing that my work can enhance daily experiences, bring comfort, and inspire others drives me to push boundaries and explore new ideas. Each project presents a fresh opportunity to create something meaningful.

"Looking ahead, we're excited to further expand our horizons and reach new communities and cities. A key part of this journey is a dedicated shift towards sustainable design in interiors; we aim to create spaces that are both beautiful and respectful of the environment."
